### **REASONS FOR ALLOWANCE**

(1)

The following is an examiner's statement of reasons for allowance: The prior art discloses methods of making polymer rotors by injecting polymer around a shaft in a mold or locating a shaft having a blind passageway and channels in a mold and holding at only one end by the shape of the mold (DE 39 03 067). The prior art of record does not disclose or suggest the method of making a polymer rotor including the steps of inserting a rotor shaft into a mold such that the at least one channel connected to the blind axially extending passageway of the shaft is located generally in the middle of the mold and the shaft is held in sealing fashion by openings in two end walls of the mold, heating the mold and shaft to the curing temperature of the polymer, pressing polymer forming material into the passageway to deliver polymer-forming materials to the mold and maintaining the barrel wall of the mold at the curing temperature until the polymer has cured.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
